Introducing New Partnership A&B BUSINESS SOLUTIONS

ReadiTech is pleased to announce a strategic partnership with A&B Business Solutions, a leading provider of hardware equipment and comprehensive business solutions based out of South Dakota.

This collaboration marks a significant milestone in both businesses commitment to delivering exceptional service and innovative solutions.

Since 1981, A&B Business Solutions has been at the forefront of providing efficient office solutions and unparalleled service. With a strong commitment to community impact and employee development, A&B continues to be a trusted resource for businesses seeking to stay ahead of the curve.

Through this partnership, ReadiTech clients will now have access to a wider variety of cutting-edge hardware solutions tailored to meet their diverse business needs. A&B has an expanded portfolio delving deeply into Production Print, Managed Print Services, Water & Coffee Services, also including Office Supply, Furniture, and Promotional Products. In 2024, A&B Business Solutions acquired Robert Sharp & Associates expanding into their solutions to include marketing and advertising.

For more information about our expanded offerings through this partnership, call 877-559-4692.

- 3. Redirect printing to more cost-effective machines**
- 4. Reduce IT time spent supporting printers and copiers**
- 5. Eliminate the cost of wasted toner inventor**
- 6. Help find ways to decrease document output spending**

How to create a strong PASSWORD

In today's digital age, securing your online presence is more important than ever. One of the simplest yet most effective ways to protect your accounts is by creating a strong password.

PASSWORD CHECKLIST:

Here are some tips to help you craft a password that will keep your information safe:

Use a Mix of Characters

A strong password should include a combination of uppercase and lowercase letters, numbers, and special characters (like !, @, #, \$). This makes it harder for hackers to guess.

Avoid Common Words & Phrases

Steer clear of using easily guessable words like "password," "123456," or your name. Instead, opt for a random string of characters or a phrase that only you would know.

Make It Long

The longer your password, the better. Aim for at least 12 characters. Longer passwords are more difficult for brute-force attacks to crack.

Use a Passphrase

Consider using a passphrase—a sequence of words or a sentence that is easy for you to remember but hard for others to guess. For example, "BlueSky!Summer2024" is both strong and memorable.

Avoid Reusing Passwords

Using the same password across multiple accounts increases your risk. If one account is compromised, others could be too. Use unique passwords for each of your accounts.

Update Regularly

Change your passwords periodically, especially if you suspect any of your accounts may have been compromised.

Use a Password Manager

Password managers, like Keeper, can generate and store complex passwords for you, so you don't have to remember them all. This adds an extra layer of security and convenience.

By following these tips, you can create strong, secure passwords that help protect your personal information and keep your online accounts safe. Stay alert and make password security a priority! For more information about Keeper, call 877-559-4692.
